L library for C++. I also create a setup program. For my programs I prefer to include the executable file in the setup program. The problem is I don't know how to make the linker to add a copy of the header file with the binary. I saw in the setup program an attribute (for example as I did in my main file) for the file that says use a copy. But I want to know how to do it for the header file. I tried to link my executable with the library file (for example libpcL_shared.dll or libpcL_shared.lib) but it still doesn't add the copy of the header file. Do you have any idea to help me? A: you can either use static link (add 'cxx' in the extension field of your project properties to link) or add a copy of the file with the.h extension to the file type of the project (for example I use "pcL_shared") I wish it was like this also for the c++ runtimes. Grosvenor Grosvenor may refer to: Places Grosvenor, Alberta, a locality in Canada Grosvenor, New South Wales, a suburb of Sydney, Australia Grosvenor Park, a park in London, England Grosvenor Square, London, England Grosvenor Street, London, England Grosvenor, Nevada, United States Grosvenor House (disambiguation) Grosvenor, North Dakota, United States Grosvenor Heights, Maryland, United States Grosvenor Square, Maryland, United States Grosvenor Township, Allegheny County, Pennsylvania, United States Other uses Grosvenor (surname) Grosvenor (novel) See also Grosvenor House (disambiguation)Description Beautiful little home just 2 blocks from the greenway in the heart of downtown Washington, D.C.
